INCUBATORS ARE HOSTED AND ADVISED BY OUR ATTORNEYS

Our national Life Sciences team supports clients in navigating the continuously evolving life sciences industry and the intricate business challenges and regulatory circumstances in which they operate. We proactively address the business concerns, government regulations and competitive currents affecting medical innovators, and help them manage risks and maximize opportunities.

Our skill sets tackle specific issues pertaining to intellectual property, compliance, labor and employment, real estate, litigation, fundraising, governance and reimbursement. With advanced technical training, specific knowledge and first-hand experience handling issues affecting clients' daily operations, we can provide the full range of legal services for companies of every size.

We work with clients through all stages of their business life cycle and throughout the global market.

The team you need, as you need them:

NP LIFE SCIENCES SERVICES

- Clinical Research Operations
- Cybersecurity and HIPAA/Data Privacy
- Health IT and Apps
- Funding and Investment Transactions
- Government Investigations
- Health Regulation and Payment Issues
- Intellectual Property
- Labor and Employment
- Mergers & Acquisitions
- Products Liability
- Risk Management

We team up with life sciences companies to:

- Evaluate and deploy innovative business models
- Navigate regulations, compliance and enforcement matters and reimbursement models
- Protect and leverage intellectual property—including patents, trademarks and big data
- Coordinate and assist with the deployment of clinical trial operations
- Establish and update data privacy policies and cybersecurity systems
- Execute mergers, acquisitions and raise capital
- Create strategic alliances that bring new technologies and services to market
- Develop payment and reimbursement strategies
- Address workforce and real estate issues

Experience

A selection of clients we've represented:

- Biotage AB, through its U.S. subsidiary Pyrosequencing, in connection with its acquisition of all of the outstanding shares in the privately held company Horizon Technology.
- Harvard University in connection with obtaining patents involving systems for analyzing mouse behavior with machine learning algorithms that parse 3D images, and a variety of other machine learning applications.
- Medicus Healthcare Solutions in connection with the sale of its business to Beeken Petty O'Keefe & Company.
- Merck Ventures B.V. as lead investor in the \$30 million Series A preferred stock financing of Ribometrix, Inc.
- Early-stage digital health companies with assistance in structuring multiple investments and advice with respect to integrating digital health products and services into a traditional health system environment.
- Manufacturers of components of a cryogenic freezer used by a hospital to store reproductive material, where the freezer allegedly failed and resulted in the loss or damage of reproductive material stored in the freezer.
- Nonprofit hospital and research institution in connection with negotiating a new license agreement with a clinical laboratory for a blood test that diagnoses irritable bowel syndrome.
- Leading medical device manufacturer in connection with providing advice regarding HIPAA compliance, investigations of several potential data breaches, the disclosure of protected health information in litigation and other matters.
- Multispecialty academic health center as primary outside IP and technology transfer counsel handling a range of patent prosecution and tech transfer matters.
