**New York, NY.** Nixon Peabody LLP is pleased to have represented TDK-Lambda Americas Inc. (TDK), a subsidiary of the multinational TDK Corporation, in its acquisition of QEI Corporation (QEI), a foremost supplier of radio frequency (RF) power delivery equipment used in semiconductor manufacturing.

The acquisition of QEI expands TDK's presence in the electronic components and power delivery manufacturing industry, further strengthening its position in the rapidly growing semiconductor equipment market to enhance the company's strategic position in the AI ecosystem. A team of Nixon Peabody attorneys previously represented the multinational electronics company in its acquisition of the first company to automate end-to-end machine learning (ML) for smart edge devices.

"We are proud to continue to support TDK in their further expansion and leadership in smart society electronic solutions," said Nixon Peabody **Corporate** partner **Brian Krob**, who led the firm's multidisciplinary deal team. "This transaction opens the door to TDK's accelerated growth of its global network across the quickly evolving semiconductor market and AI ecosystem. We are excited to see how these two great teams will continue to innovate and grow in the sector."

In addition to Krob, the Nixon Peabody team involved in this acquisition included partners **Conrad Adkins**, **Brian Alcala**, **Gary A. Band**, **Patrick Cox**, **Christopher Grigg**, **Sami Groff**, **Alexandra Lopez-Casero**, **Damian Myers**, and **Dana Stanton**; counsel **David Crosby**, **Andrew Hahn**, and **Jason Kunze**; and associate **Samantha Lopes** and **Robert Pethick**.

To learn more about the transaction, see TDK's [press release](#).
